

**EASY AND SAFE
FOLIAR APPLICATION**

ABC Flowering

**HIGHLY BIOAVAILABLE
FOOD FOR FLOWERING
PLANTS**

ABC flowering formulation is designed specifically to fulfil a plant's needs for rich flowering and blooming. Bud formation and blooming requires specific nutrients such as P, K, B, Zn, Si and other minerals for vibrant and rich flowering. Potted plants need a regular feed of these nutrients to promote and maintain flowering. Regular application of ABC Flowering results in constant flowering, more flowers, brighter and bigger flowers with an extended flowering period without overstimulating the plants. ABC doesn't have strong smell and is organic, making it suitable and safe for indoor use.
