

ABC SUCCULENT

*A unique
formulation
specifically for
succulents*

ORGANIC,
SAFE FOR
PETS, BIRDS
AND
POLLINATORS

*Highly bioavailable
food for maintaining
healthy & lush
succulents*

Grow and maintain healthy and beautiful succulents at home with ABC Succulents. Like all potted plants, succulents would do well if provided with regular feed of balanced nutrients. ABC formulation for succulents includes only organic forms of N, P, K along with other elements and organic acids, which are easily consumed by plant tissues and are efficiently metabolized to build roots, leaves and flowers. As succulents are light feeders, ABC has just the right blend of nutrients to help them grow healthy and beautiful without getting burned or damaged. ABC succulent being organic is absolutely safe for indoor use.

Easy and safe foliar application every 7-15 days
